

**Description:**

Teams try to guess the answers to questions earning points along the way. The team with the most points after 3 rounds wins a prize.

**Set Up:**

- Print the enclosed Survey Question cards and strike cards. (There are United Way based questions or you can make your own company-related questions.)
- Print the Answer Board grids and Scoreboard or use a white board or flip chart for the answer and score boards.
- Divide your group into two teams.

**Playing the Game:**

- Each round begins with a Face-Off. Each team chooses a player for the Face-Off. The host announces the number of answers on the board for the question (mark out extra spaces on the Grid or make a numbered list on the white board/flip chart). The host then reads the question aloud.
- Each player in the Face-Off competes to answer the question by raising his/her hand. The host chooses the player who raised his/her hand first, and that player must give an answer to the question immediately.
  - If the answer given is the number one answer for the question, the host writes it in the top slot on the board along with the number of points for that answer. The player may then choose to pass or play.
  - If it is not the number one answer on the board or not on the board at all, the opposing team member is given a chance to give an answer. If his/her answer is higher on the board, that player may choose to pass or play. If his/her answer is lower, control goes back to the first team.
  - If both players give an answer that is not on the board, a new player is chosen from each team to answer the question in the same order as the first two players.
  - Whichever team gives the answer that is highest on the board (has the most points) wins the Face-Off. The team that wins the Face-Off may play or pass the question to the other team. The team playing the question becomes the "controlling team".
- Players on the controlling team take turns guessing the top answers to the question. Players cannot help each other answer the question. When a player gives a correct answer, the host writes it in the correct place on the scoreboard along with the answer's corresponding points.
- When a player gives an incorrect answer or takes too long to answer (determined by the host), it counts as a strike and the host turns over one of the strike cards (or marks an "X" on the white board/flip chart).
- If the controlling team gives all the remaining answers to the question without getting three strikes, the points are totaled and written on the scoreboard.
- If the controlling team gets three strikes before all the remaining answers are guessed, the opposing team takes control and is allowed one guess to try to match a remaining answer and steal the points. If they don't guess correctly, the points are awarded to the original controlling team. Only the points for answers guessed correctly are awarded.
- Game continues in the same manner for Rounds 2 & 3 with a new member from each team chosen for the Face-Off. if you like, the points can be given double value for Rounds 2 & 3.
- The team with the most total points after 3 rounds is the winner!
