

# Impact Game

## Description:

Seven numbers are revealed to the contestant in random order. The contestant has 30 seconds to put them in the correct order of the dollar amount United Way of Greater Stark County invested in the community during the 2017-2018 cycle.

## Set Up:

- Print the enclosed number sheets and cut them in half. You will have 7 numbers and one dollar sign.
- Lay the numbers on a table or tape them to a wall or white board in random order (place the dollar sign in the proper position)
- The contestant moves the numbers into the 7 digit position they think is the correct amount and rings a bell or announces a key word (such as "Done" or "Check"). During the 30 seconds, the contestant may continue guessing, however the final guess must be completed before time runs out.
- If the contestant puts the numbers in the correct order in 30 seconds, he/she wins a prize.

## Multi-player/Team Option:

- Divide your group into several teams of 4-6 players.
- Print a set of numbers for each team and place them at different "stations" around the room. Send the teams to the different stations. When the timer starts, each team works together to arrange the numbers in the 7 digit position they think is the correct amount and rings a bell or announces a key word.
- The team that puts the numbers in the correct order first and within the time limit, wins a prize.

## Actual amount invested:

**\$5,590,343**
